Re: Declaration

Greetings:

Reference is made to the declaration in the name of Richard C. and Ruth M Cauble received at the District IV Office of the State Engineer on October 7, 2009 and amended October 19, 2009. Upon review of the declaration and consultation with chief counsel to the State Engineer it has been determined that said declaration cannot be accepted for filing. The declaration attempt to modify specific elements of the irrigation right appurtenant to lands irrigated under surface water right permit 8. It's been a long standing position of this agency that a permitted water right may not be modified by the filing of a declaration. The surface water rights identified in your documentation are also captured and identified in the Lower Rio Grande Hydrographic Survey filed with the Third Judicial Court and identified in subfile LRN- 280090245.

A determination on the extent of the water rights along with the priority date associated with your rights, as well as all water rights in the Lower Rio Grande, will ultimately be made by the Third Judicial District Court as it adjudicates the surface and groundwater in the basin. Accordingly, any evidence to dispute survey findings should be submitted to the Legal Division upon receipt of an offer of judgment on said rights.

Sincerely,

Calvin Chavez, Manager
District IV Office
